

# Main Page

Logo

Main About Contact

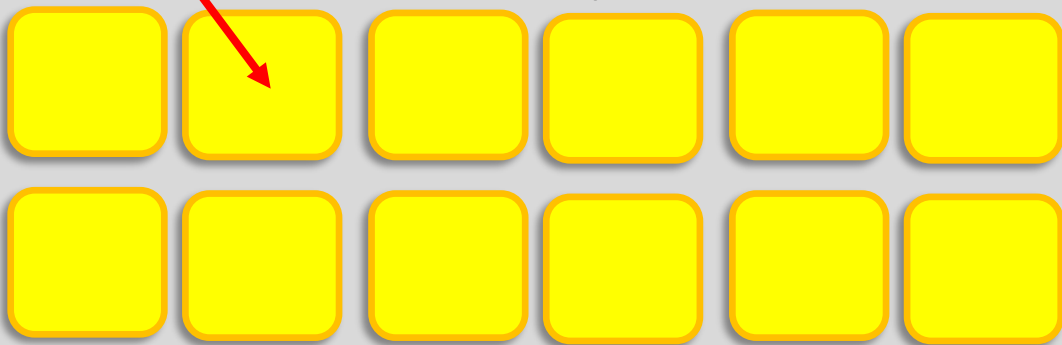

This will be the main header (Jumbotron I think it is called). A picture and brief description of the event.

Event Speakers

Schedule of the day

Each one will contain an attendee and I want these to reformat the layout depending on screen size

List of attendees that will be populated from the 'Form' input.

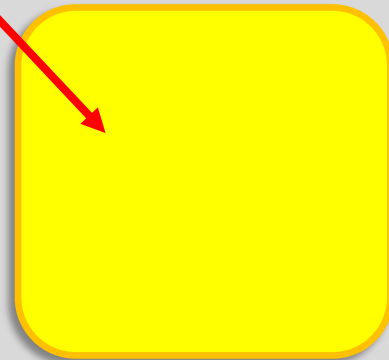

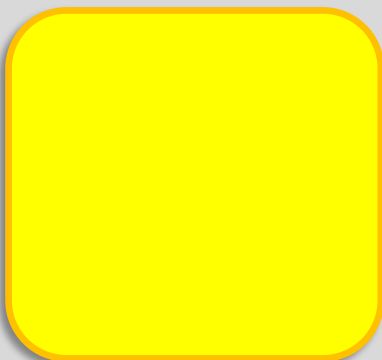

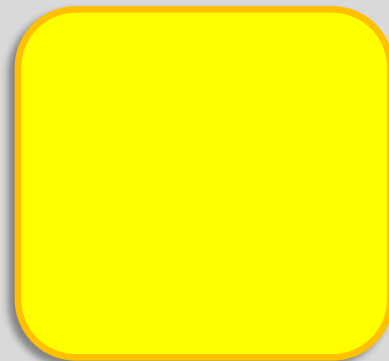

Sticky footer (with whatever goes in a footer)

# About Page

**Some text about how the event came to be.  
Maybe an embed video of past events**

**Some text about how the event came to be**

Individuals that made the event happen and again change layout depending on screen size.

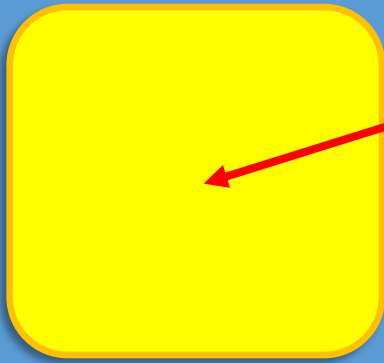

# Contact Page

**General contact/location details i.e. address, tel,  
email.**

**Map of the location of the event**

# Guess Form

Upload an image

I will use HTML attributes on the tags to determine what is entered as this will effect the type of keyboard you get on mobile devices

Name

Address

Tel

Email

List of skills you have or are interested in i.e. HTML, CSS, JS, etc.... But I what this to be the languages symbols that they click to add to them using svg files.
